SECTION III - COMMODITY LOAN AND PURCHASE AGREEMENT PROGRAMS	46
a. 1953 Commodity Loan and Purchase Agreement Summary	47
b. Wheat	
(1) Warehouse Storage	47
(2) Farm Storage	49
(3) Purchase Agreements	50
c. Corn	
(1) Warehouse Storage	50
(2) Farm Storage	50
d. Peanuts	
(1) Farm Storage	51
(2) Growers' Peanut Advance Loans	51
e. Soybeans	
(1) Warehouse Storage	51
SECTION IV THE 1953 DROUGHT EMERGENCY PROGRAM	52
A. Summary of 1953 Drought Emergency Program	53
(1) Mixed Feeds Furnished	53
(2) Unmixed Commodities Furnished	53
(3) CCC Commodities Included in Mixed Feeds Plus Unmixed Commodities Furnished	53
B County Summary of Drought Emergency Feed Furnished	54

FOREWORD

This report is primarily a compilation of statistical data with respect to the several farm programs administered by the Agricultural Stabilization and Conservation in Virginia during the calendar year 1953. It is the seventh in a series commenced in 1947.

Since ASC activities fall into three principal divisions, this report is presented in the following sections:

(1) Agricultural Conservation Program, (2) Marketing Quota Programs, and (3) Price Support Programs. Another important activity carried out in collaboration with State and County USDA Drought Committees was the Drought Emergency Program.

The purpose of this report is twofold - to provide ASC committeemen and other agricultural workers with information that is not readily available from other sources and to acquaint other persons interested in agriculture with the work of ASC.

We acknowledge with full appreciation the help received from our committeemen, county office staffs, and other persons and agencies in compiling the information included in this volume. We sincerely hope that it will be useful to those whom it will reach.

Virginia ASC State Committee

E. D. Duncan, Chairman
Roy B. Davis, Jr.
H. Ryland Heflin
W. H. Daughtrey

SECTION I - THE 1953 AGRICULTURAL CONSERVATION PROGRAM

Through the 1953 Agricultural Conservation Program, the Nation provided assistance to aid individual farmers in protecting and improving their land and in conserving water. The 1953 program was developed jointly by the Production and Marketing Administration, the Soil Conservation Service, and the Forest Service, working with local conservation districts and with the assistance of other interested State and Federal agencies.

Every effort was made to see that program assistance was directed to those soil and water conservation practices which farmers would not carry out to the extent necessary for the national welfare without this assistance. Every effort was made to see that program assistance was directed to those needed practices which had not become established in farmers' regular operations on their farms. This assistance was used to encourage and aid farmers to carry out conservation over and above what they would do with their own resources and on their own initiative.

The practices included for individual farms were aimed toward the most permanent benefit to the productive capacity and conservation of the agricultural resources of the area.

Community committeemen were used to make farm-by-farm contacts in enrolling farmers in the 1953 program. There has been a decided increase in the volume of the more permanent-type practices, such as terraces, dams, improved pasture, irrigation structures, contour strip-cropping, and forestry improvement.

SECTION II - MARKETING QUOTA PROGRAMS

Marketing quotas become operative at the discretion of growers themselves. The purpose of marketing quotas as stated by the Congress, is to enable farmers, who cannot do so individually, to work together to maintain supplies in line with demand and thereby protect prices at fair levels. When the supply exceeds defined levels--that is, when there is a surplus--or, if a quota was announced for the immediately preceding year, the Secretary of Agriculture is required to announce a quota and to hold a referendum. Growers decide by their vote in the referendum whether quotas will be used. Quotas cannot be used unless they are approved by two-thirds or more of the growers voting in the referendum.

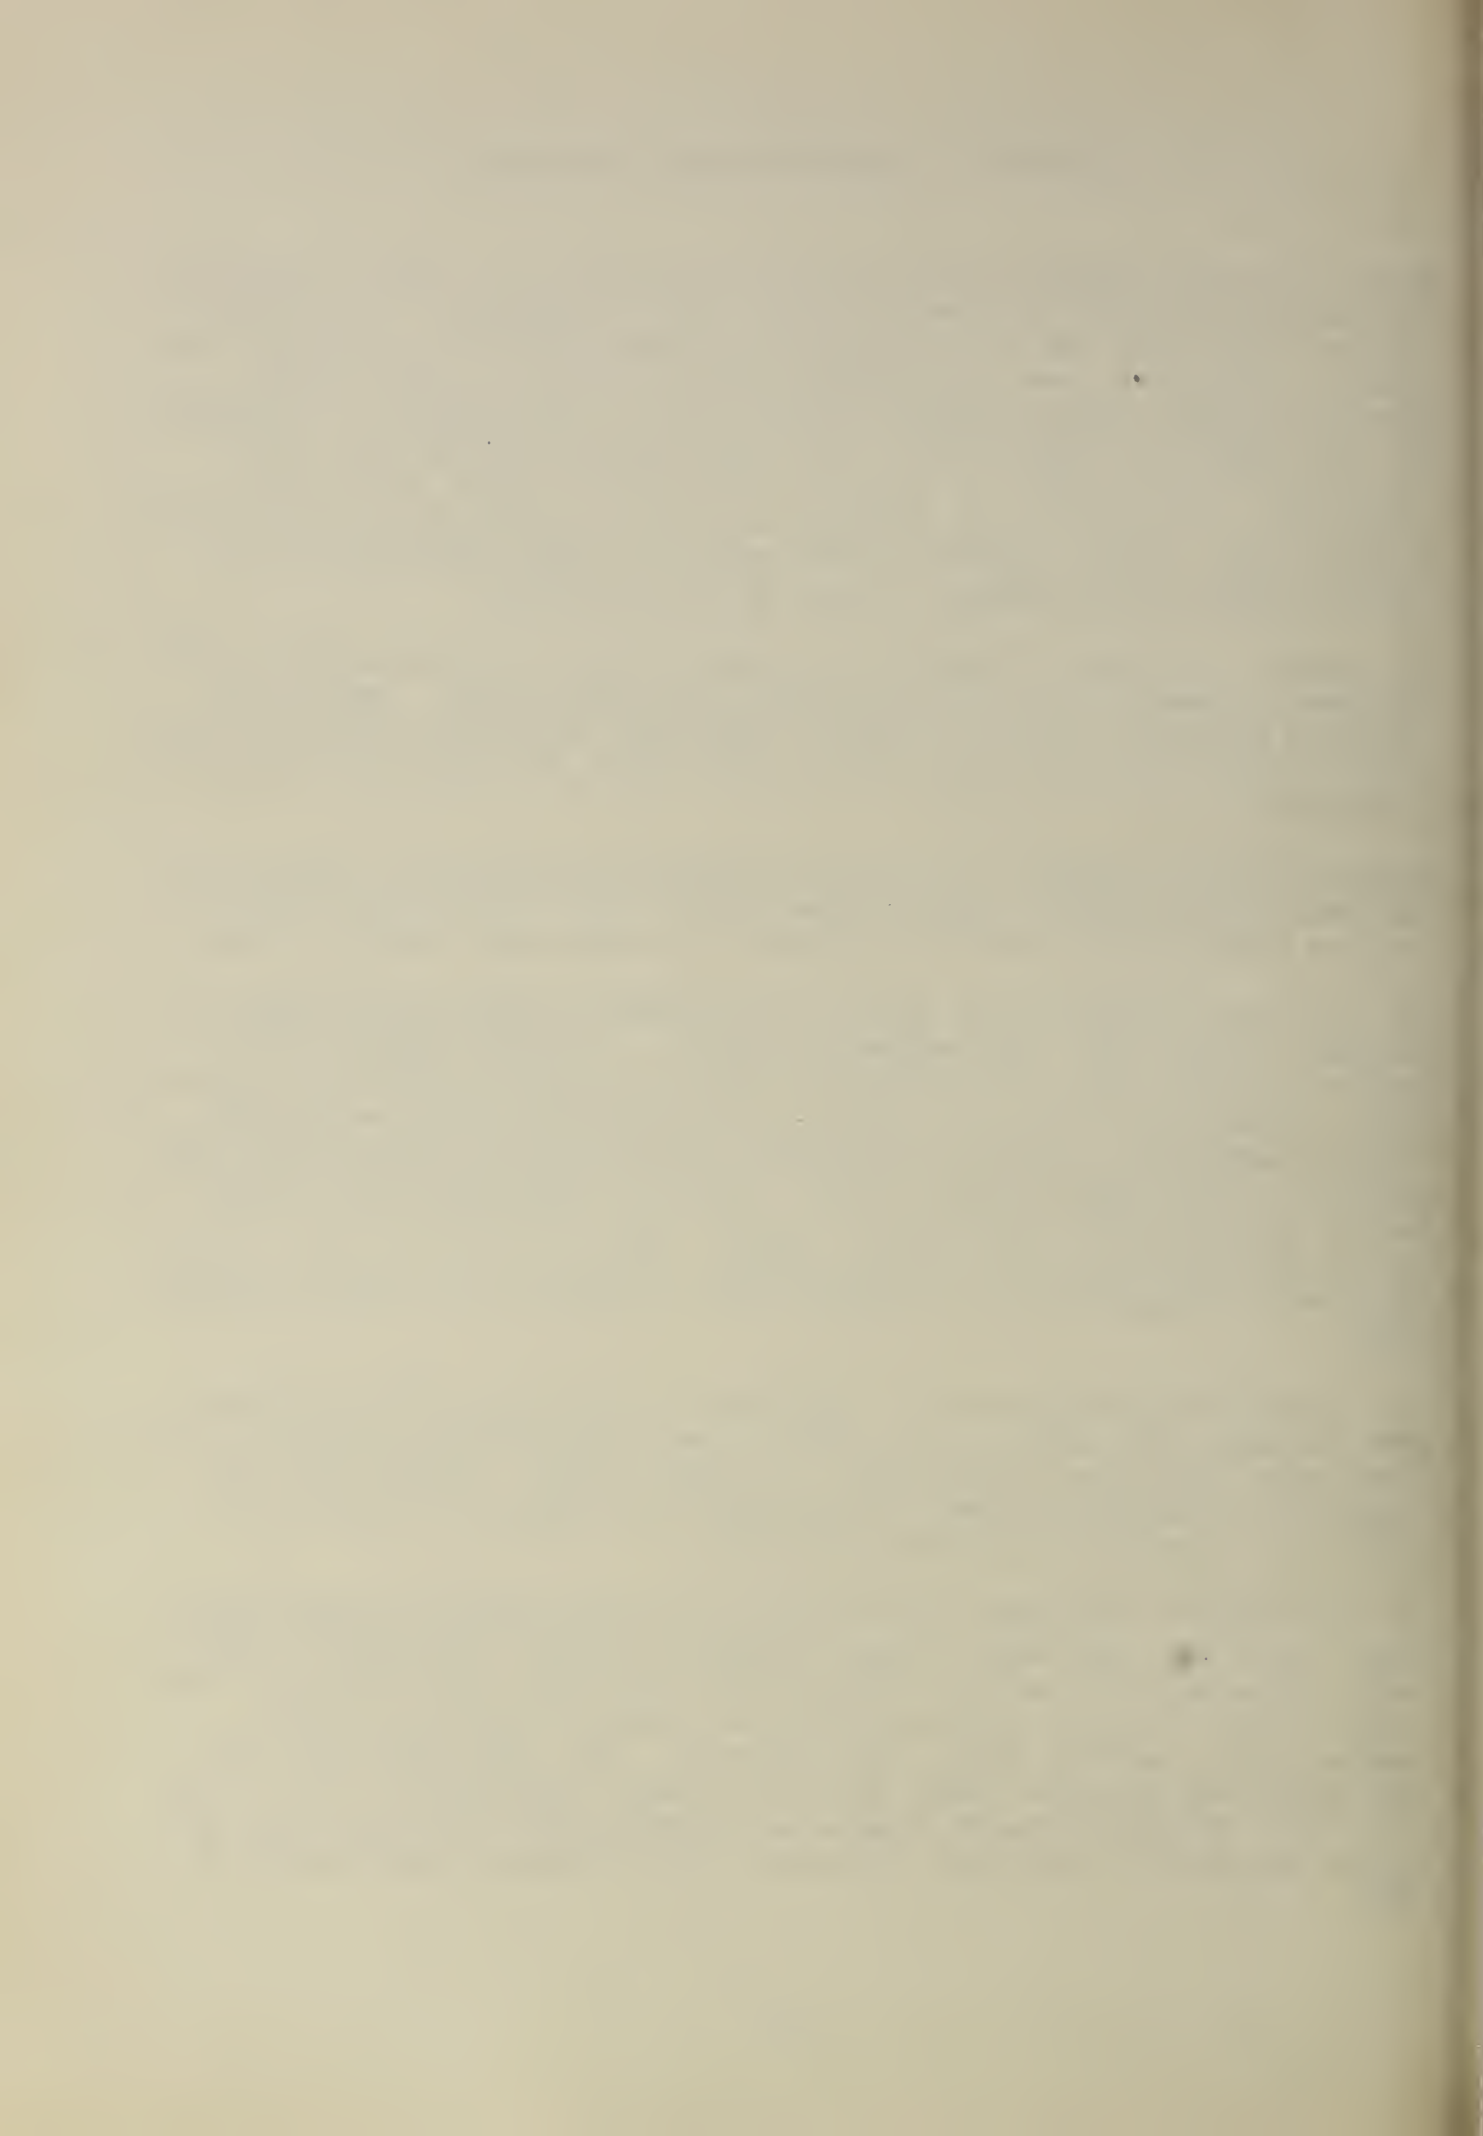

By keeping the amount produced fairly equal to the expected amount to be consumed, growers receive and consumers pay a fair price. Under such balanced conditions there is orderly marketing, no wasted production, and still better, no wasted soil fertility and labor that goes into surplus production.

Marketing Quota Programs in Virginia during 1953 operated on peanuts and the four major kinds of tobacco grown here as well as Maryland Type-32 tobacco which is produced in this State on a very small number of farms.

The authority for marketing quotas is contained in the Agricultural Adjustment Act of 1938, and amendments thereto. This Act empowers the Secretary of Agriculture to declare a national marketing quota on certain basic commodities when total supply at the beginning of the marketing season (carry-over stocks plus expected production) exceeds what the law defines as the proper reserve level. However, marketing quotas do not become operative until approved by growers in a referendum by at least a two-thirds majority of the growers voting. Quotas are, of course, either approved or disapproved on a national basis covering all areas of production.

The national marketing quota is expressed in the usual unit of measurement (pounds or bushels), but to facilitate apportionment to States it is translated into acres on the basis of recent yields. These acres are allotted to individual farms on the basis of a number of factors with particular emphasis on production history.

In 1953 Burley, flue-cured, and Virginia sun-cured tobacco farmers produced the first crop under renewed three-year quotas, approved in separate referenda, for the years 1953, 1954, and 1955. The 1953 fire-cured crop was the second to be produced under renewed three-year quotas approved for the 1952, 1953, and 1954 crops. The 1953 peanut crop was the third crop produced under three-year quotas approved for 1951, 1952, and 1953. Maryland Type-32 tobacco was produced in 1953 under marketing quotas approved for the year 1953 only in a referendum held October 29, 1952.

National results of the latest referenda held on tobacco and peanuts are as follows:

Kind	Date of Referendum	Crop Years Covered	Total Votes Cast	Percentage of Votes		
				For 3 yrs.	For 1 yr.	Against
Burley	11/22/52	1953-54-55	179,493	97.0	1.3	1.7
Fire-cured	12/7/51	1952-53-54	13,350	96.5	1.8	1.7
Flue-cured	7/12/52	1953-54-55	260,163	97.8	1.0	1.2
Va. Sun-cured	11/22/52	1953-54-55	2,095	97.1	2.0	0.9
Maryland	10/29/53	1954-55-56	5,171	51.3	12.8	35.9
Peanuts	12/15/53	1954-55-56	66,433	94.3	0	5.7

Virginia growers have voted in favor of marketing quotas by overwhelming majorities comparable to the national figures. As shown above, quotas were not approved for 1954 on Maryland Type-32 tobacco, but were renewed for peanuts for the years 1954, 1955, and 1956.

Not only do quotas limit production to the quantity which the market can absorb in an orderly manner, but they assure a fair price to the grower. When quotas are in effect, growers who plant within their acreage allotments and otherwise abide by quota regulations, are assured of price support at a level defined by law, which in the case of all kinds of tobacco is 90 per cent of parity and for peanuts 90 per cent of parity (through the year 1954).

Tobacco prices are supported to individual farmers who harvest within their acreage allotments by nonrecourse loans made to the farmers producing the tobacco. Loans are made during the regular marketing seasons through growers' cooperative associations under contract with Commodity Credit Corporation. The grower is assured of a price equal to the loan rate since he may negotiate a nonrecourse loan on any particular lot of tobacco for which the auction price on the warehouse floor is not above the loan level for the particular grade. Tobacco placed under loan is later sold by the cooperative association, and any profits above all costs, such as re-drying, packing, and storing, are prorated to the original growers.

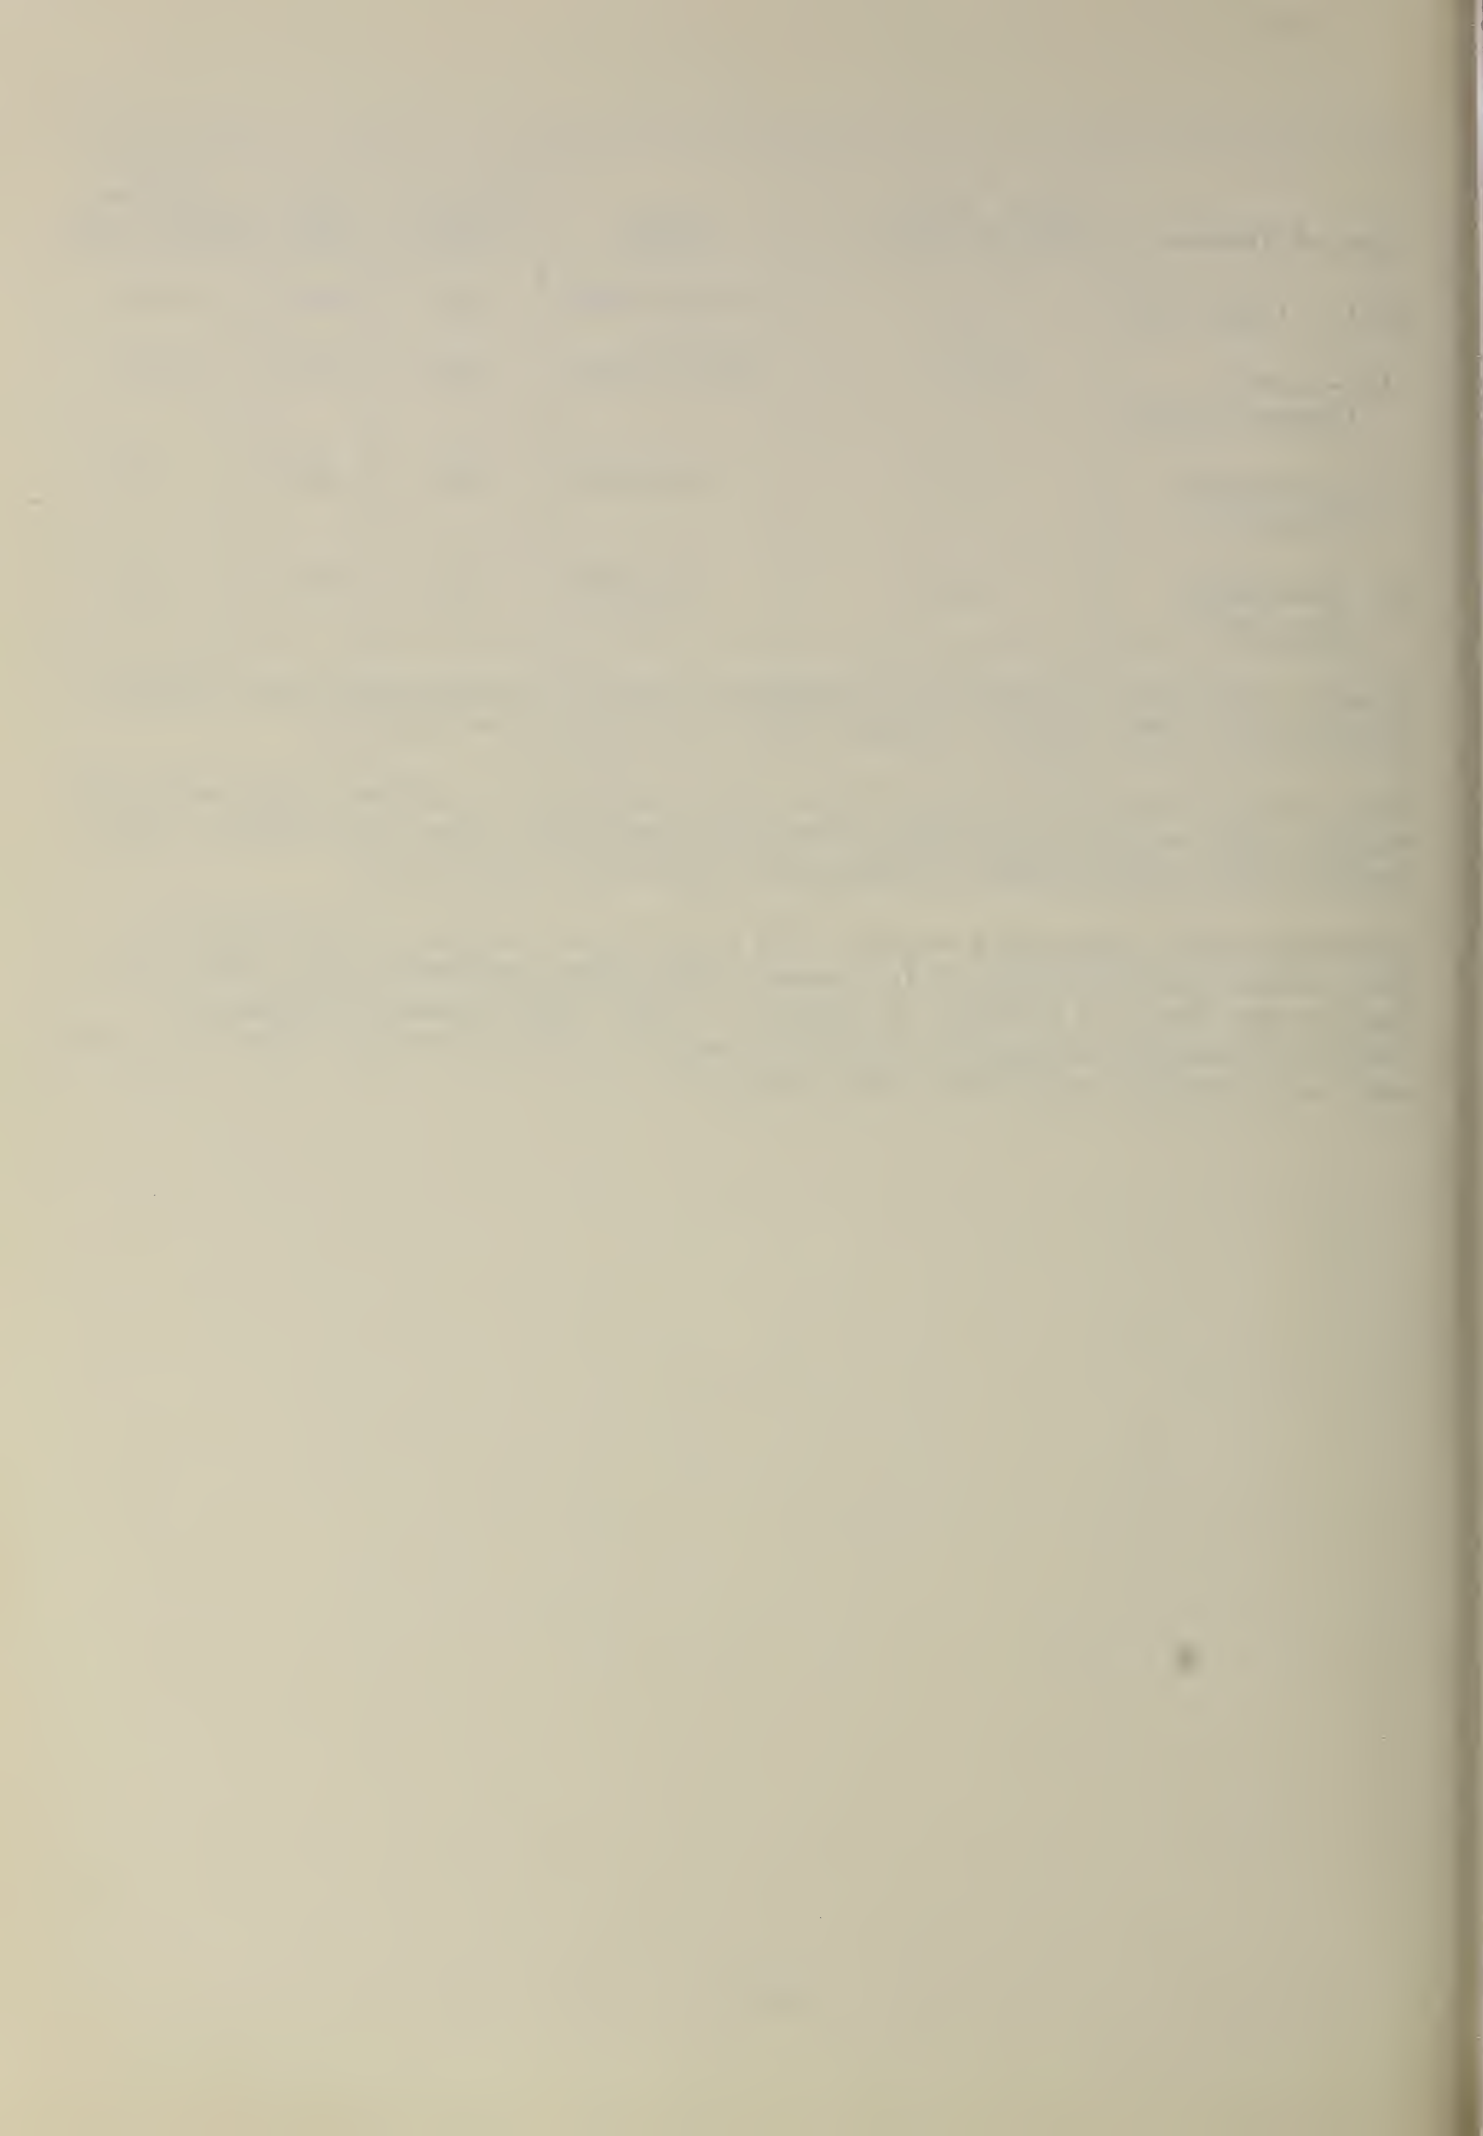

The following summarization shows by major kinds of tobacco for the 1953 crop (1) producer's total sales, (2) value, (3) average price per pound, (4) loan rate, and (5) per cent taken under loan.

Type of Tobacco	Total Sales (Million Lbs.)	Value	Average Price	Loan Rate	Per Cent Placed Under Loan
Burley (Type 31)	561.5	295,299,865	52.6	46.6	18.2
Flue-cured (Types 11-14)	1268.6	669,978,104	52.8	47.9	11.9
Va. Fire-cured (Type 21)	9.0	3,193,873	35.6	35.0	7.3
Va. Sun-cured (Type 37)	2.9	923,338	31.8	31.1	0.8

Drought conditions prevailing throughout most of the growing season sharply affected the 1953 crop of tobacco both as to yield and quality.

The price of the 1953 crop of peanuts was supported to growers who harvested within their acreage allotments through farm-stored loans and advance loans through the Peanut Growers Cooperative Marketing Association.

Marketing quota penalties on the 1953 crop in the amounts of \$125,540.47 for tobacco and \$173,981.63 for peanuts have been collected from those producers who chose to harvest in excess of their farm acreage allotments thereby becoming ineligible for price support on the crop for which the allotment was exceeded and liable for penalty.

G. COTTON

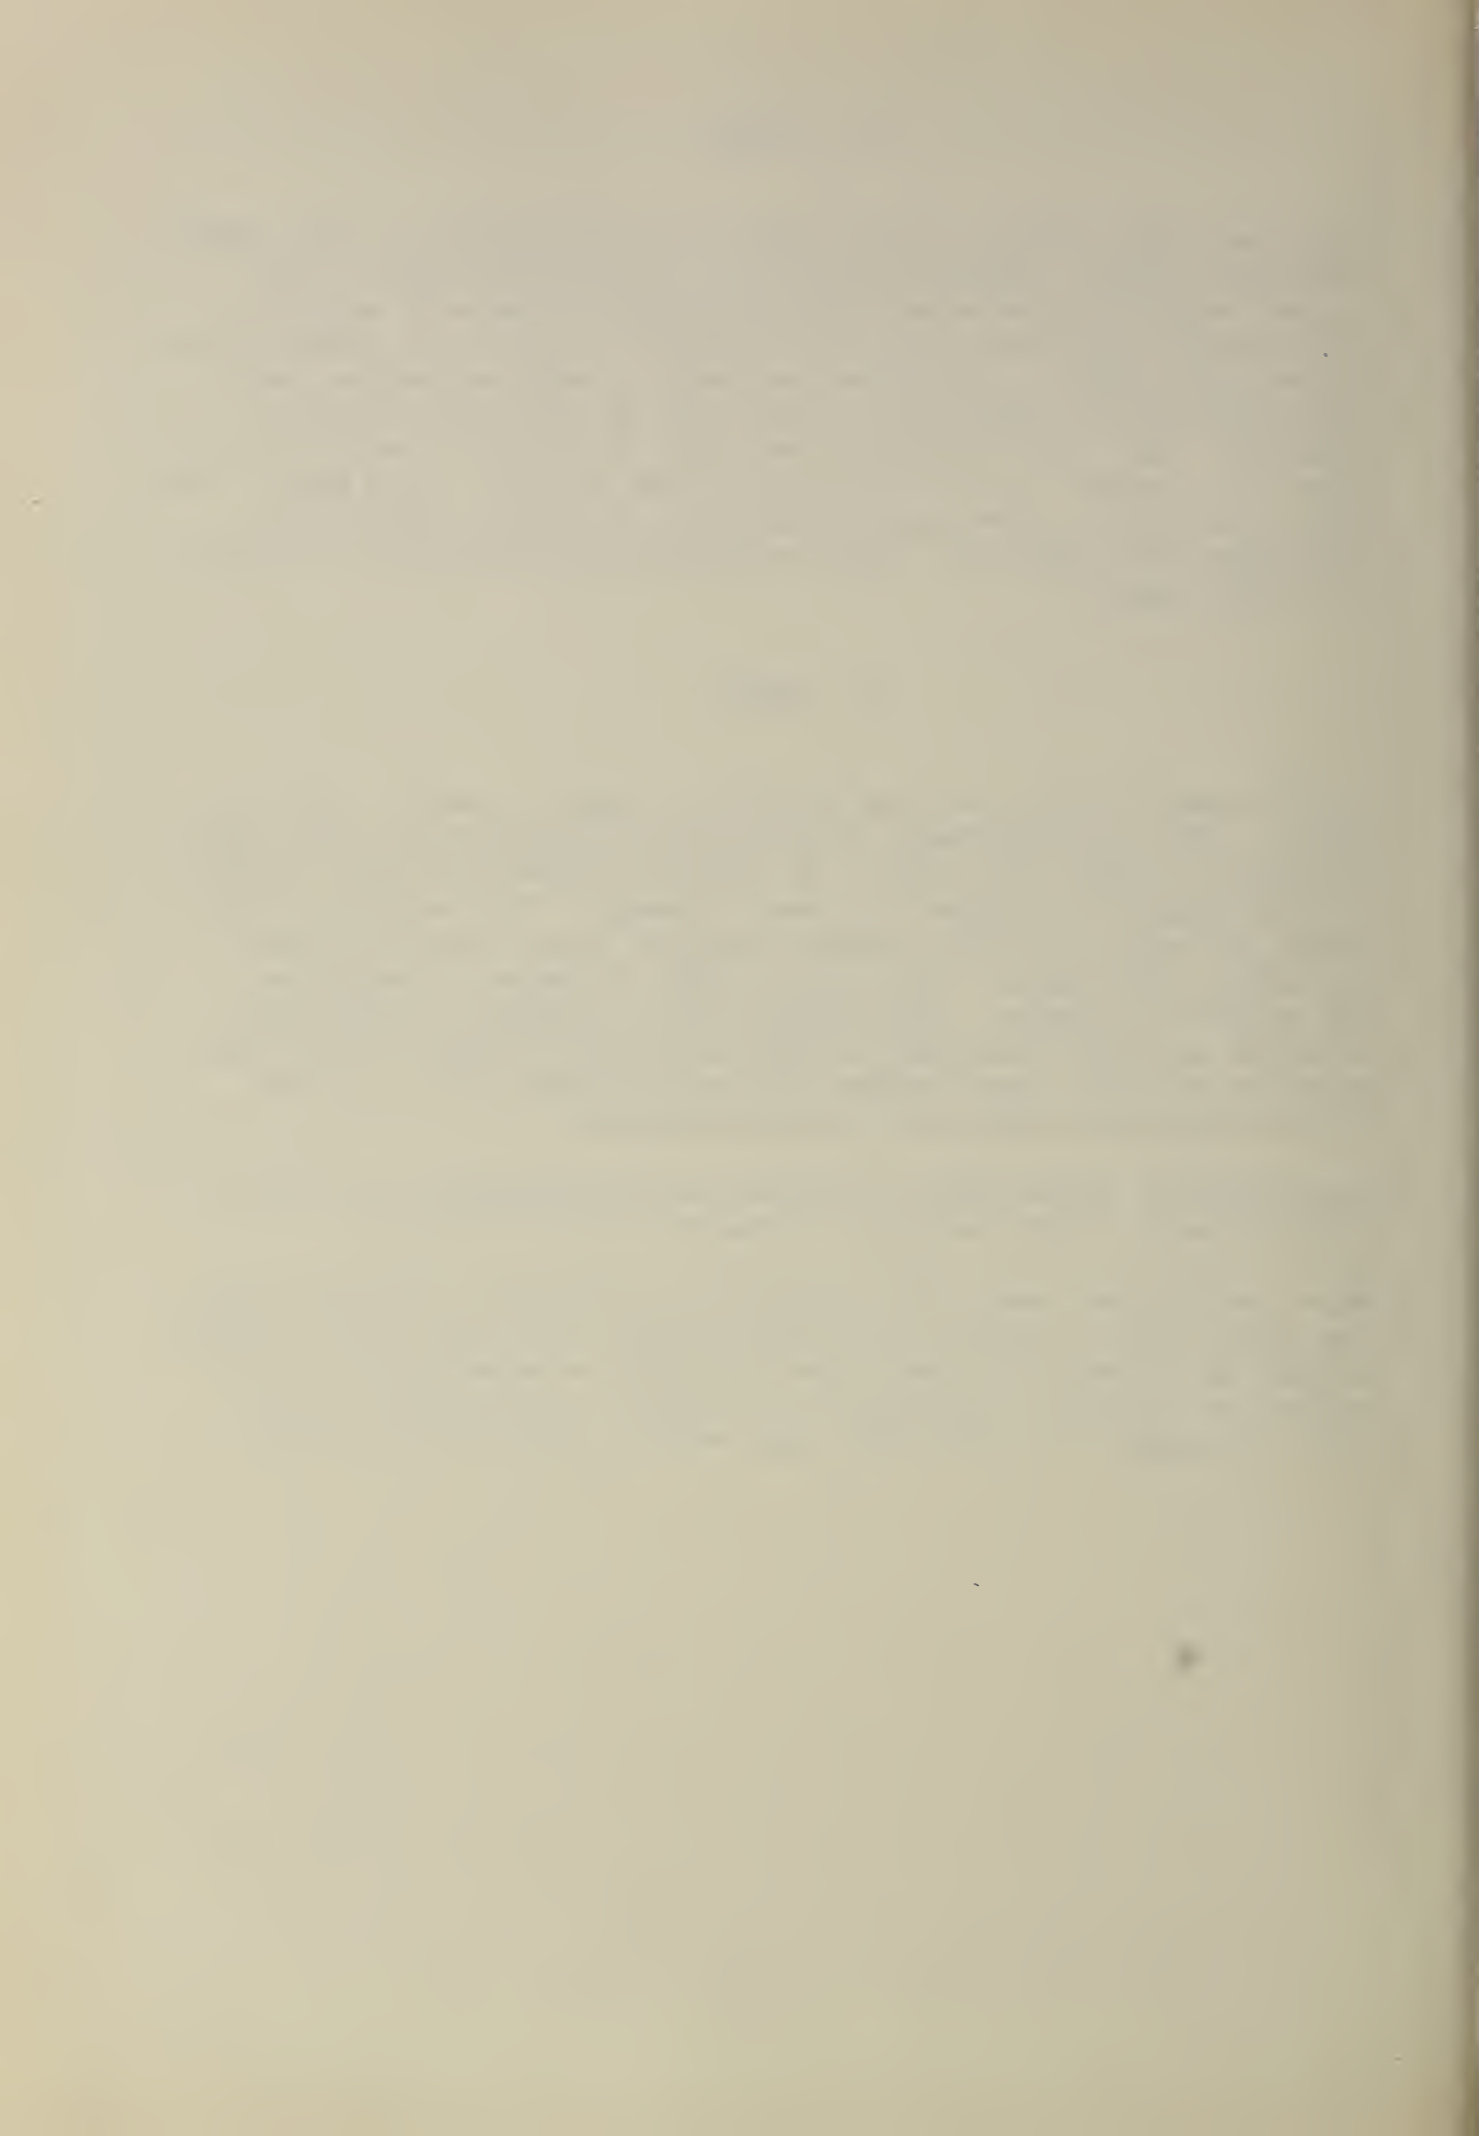

With the total national cotton supply at the beginning of the 1953-54 marketing season, estimated to be 25.5 per cent in excess of the normal supply, the Secretary of Agriculture announced a marketing quota program for cotton in 1954 subject to approval of growers. On December 15, 1953, a referendum was held in which marketing quotas were approved for 1954 only by more than the required two-thirds majority. The vote in Virginia was 2,236 in favor of quotas and 561 opposed to quotas. In 22 cotton producing counties, some having only one or two farms, there were established a total of 6,882 cotton allotments for 1954 with a total allotment for the State of Virginia of 21,682 acres.

H. WHEAT

In 1953 there were no acreage controls on wheat; however, prior to July 1, 1953, the Secretary of Agriculture announced that the supply situation on wheat was such as to require a marketing quota program in 1954 subject to approval of wheat growers. In a national referendum on August 14, 1953, growers approved wheat marketing quotas for 1954. In Virginia, the vote was 1909 in favor of quotas and 319 opposed to quotas. Only growers with allotments of more than 15 acres or those intending to grow more than 15 acres in 1954 were eligible to vote, since farmers with wheat acreage of less than 15 acres were not affected by marketing quotas.

Approximately 43,500 wheat allotments were established for 1954 in Virginia with a State acreage allotment of 317,372 acres..

Wheat acreage has been slowly declining in Virginia during the past ten years, but in the fall of 1953 seedings were drastically reduced because of acreage allotments and difficulties encountered in preparing the land as a result of the drought. Wheat seeded in the fall, estimated to be 294,000 acres, was the smallest on record.

SECTION III - 1953 COMMODITY LOAN AND PURCHASE AGREEMENT PROGRAMS

Administration of the commodity loan and purchase agreement phases of price support programs was carried out by county committees and county office personnel. Through these programs price support was offered eligible farmers through warehouse- or farm-stored loans or by purchase agreement. On peanuts support was offered through farm-stored loans or advance loans through the Peanut Growers Cooperative Marketing Association. Eligible commodities included barley, corn, oats, peanuts, rye, soybeans, and wheat.

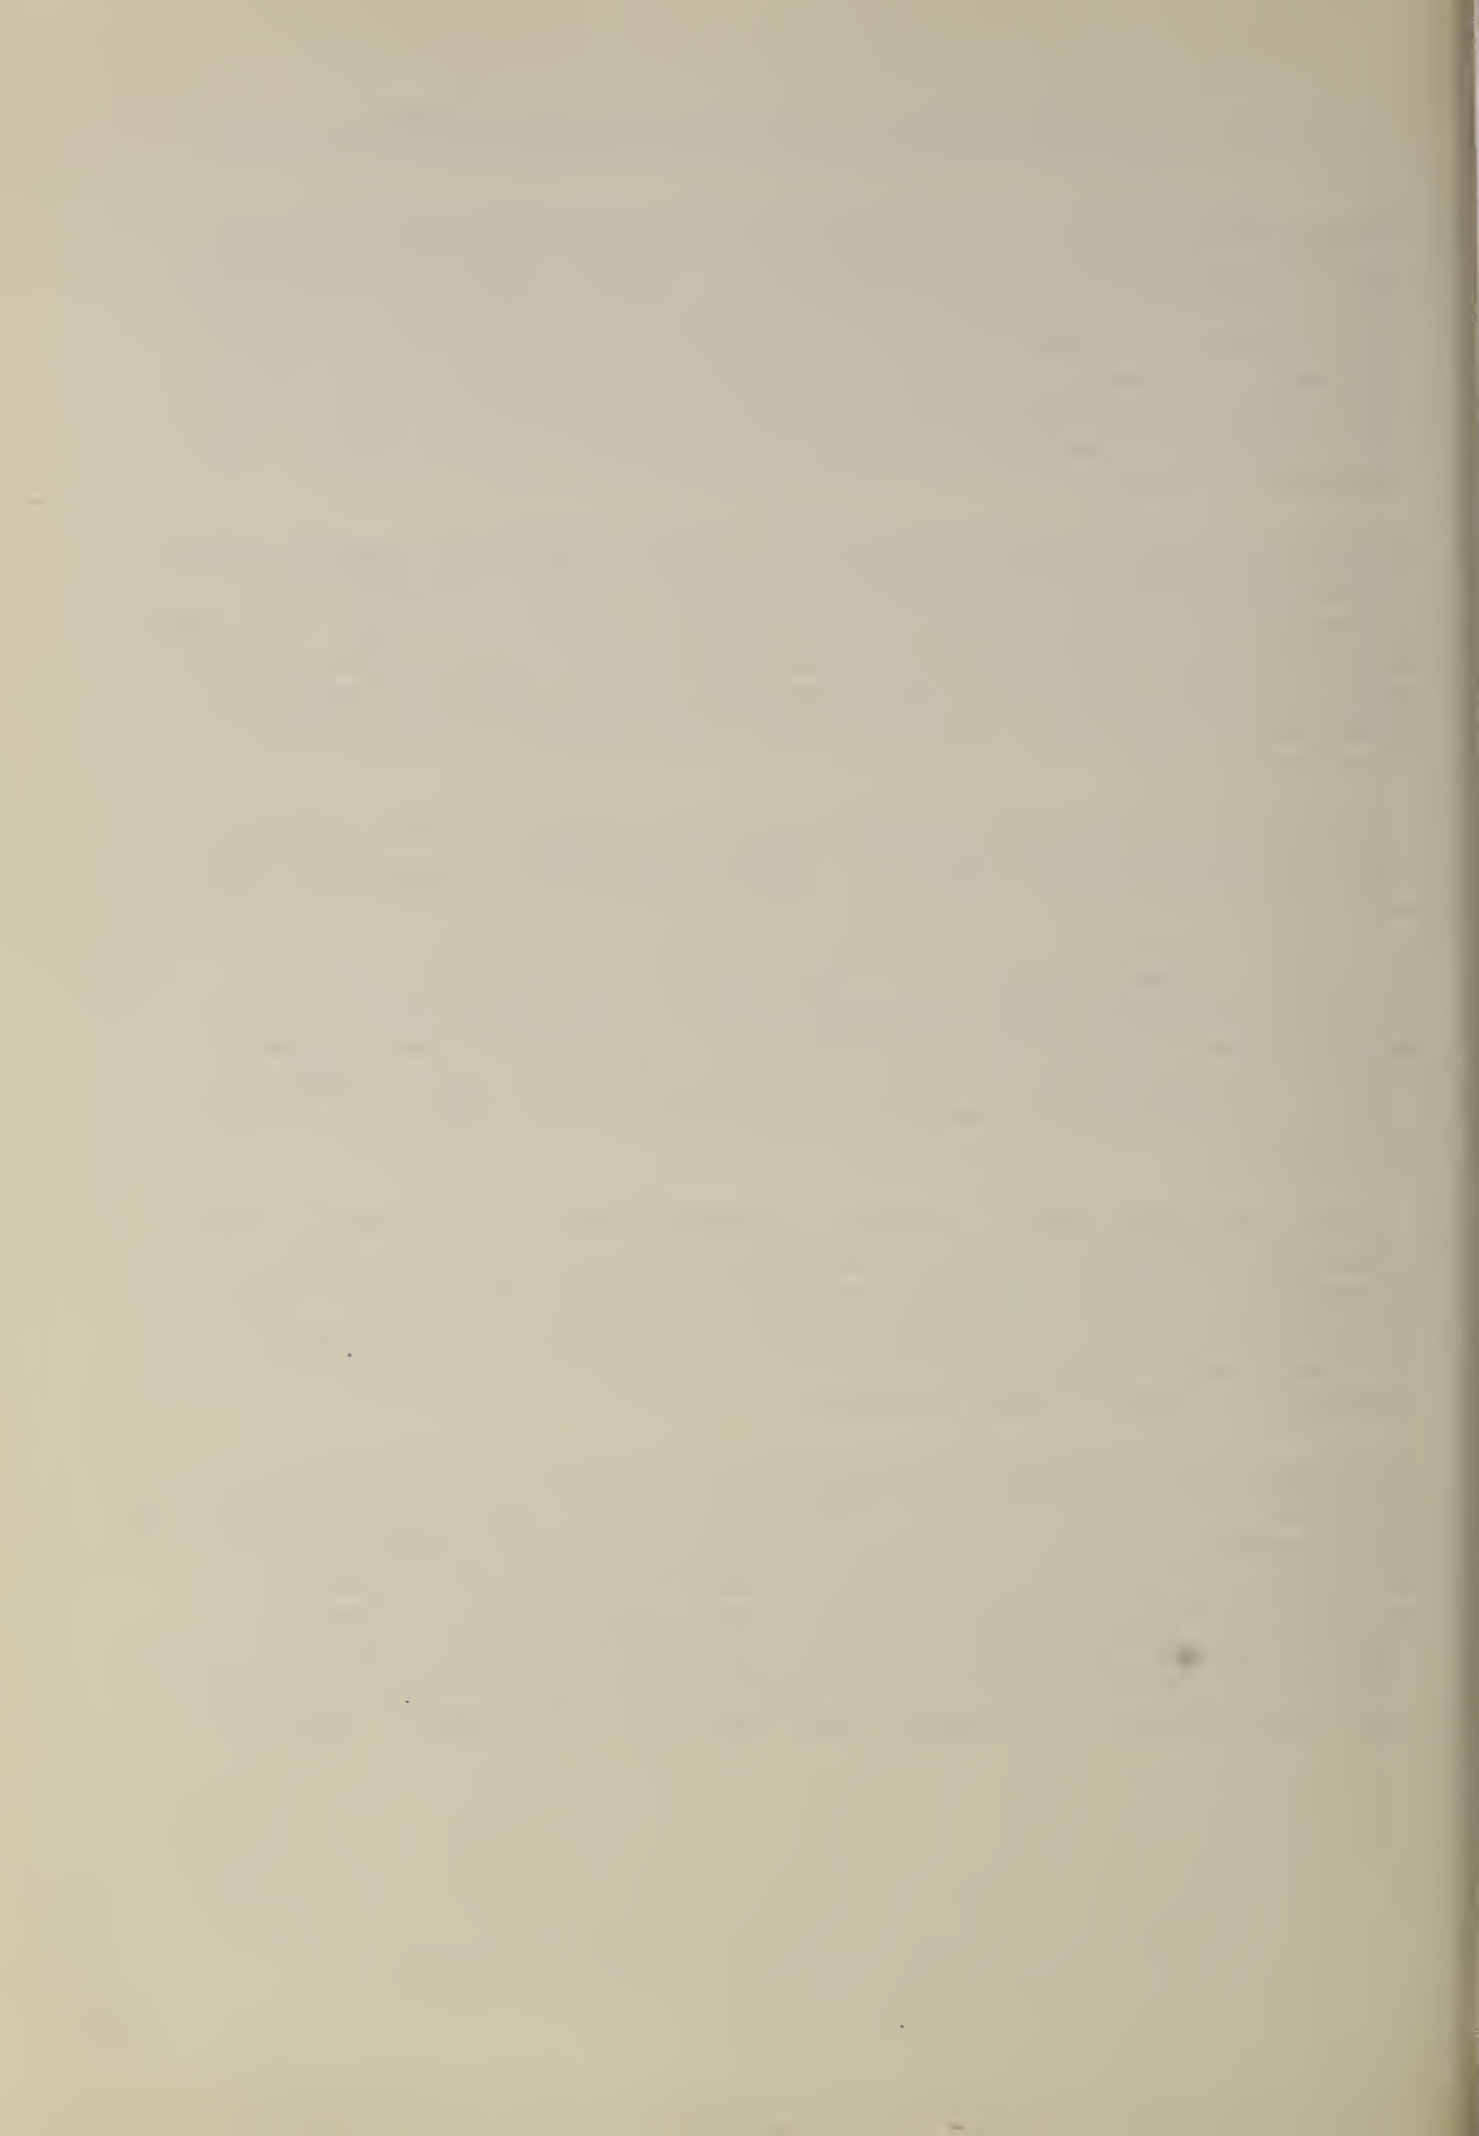

Through agreements between cooperating warehousemen and Commodity Credit Corporation farmers stored large quantities of wheat in warehouses around the State and obtained loans on this stored collateral. Corn and soybeans were also stored in smaller quantities under the same arrangements. Various banks in cooperation with county committees made disbursement of the loans; in other cases disbursement was made direct by county committees.

Federal-State inspectors provided inspection service at most warehouse locations and at other stations. Samples drawn from farm-stored grain were graded by Federal-State inspectors with loans made on a grade basis.

The Peanut Growers Cooperative Marketing Association at Franklin, Virginia, operating under agreement with CCC received farmers' stock peanuts from eligible producers throughout the peanut area, and made advance loans to producers of the support rate less nominal charges. Profits in handling the peanuts are prorated to the producers by the Association.

Cotton loans were made to eligible producers through cooperating warehouses and lending agencies by arrangement with Commodity Credit Corporation. Of the 1953 crop cotton loans were made on 1,009 bales, a substantial increase over prior years in this State. Price support on cottonseed was provided by means of a purchase program involving participation of ginner and oil millers.

Altogether, many different organizations and agencies contributed to carrying out of price support commitments in the State. Lending agencies, warehousemen, Extension Division workers, the Virginia Department of Agriculture, and the Peanut Growers Cooperative Marketing Association, by their excellent cooperation with county committees and Commodity Credit Corporation, made substantial contributions to the administration of these programs. Without the assistance of these groups, price support possibilities for farmers would have been very greatly impaired.

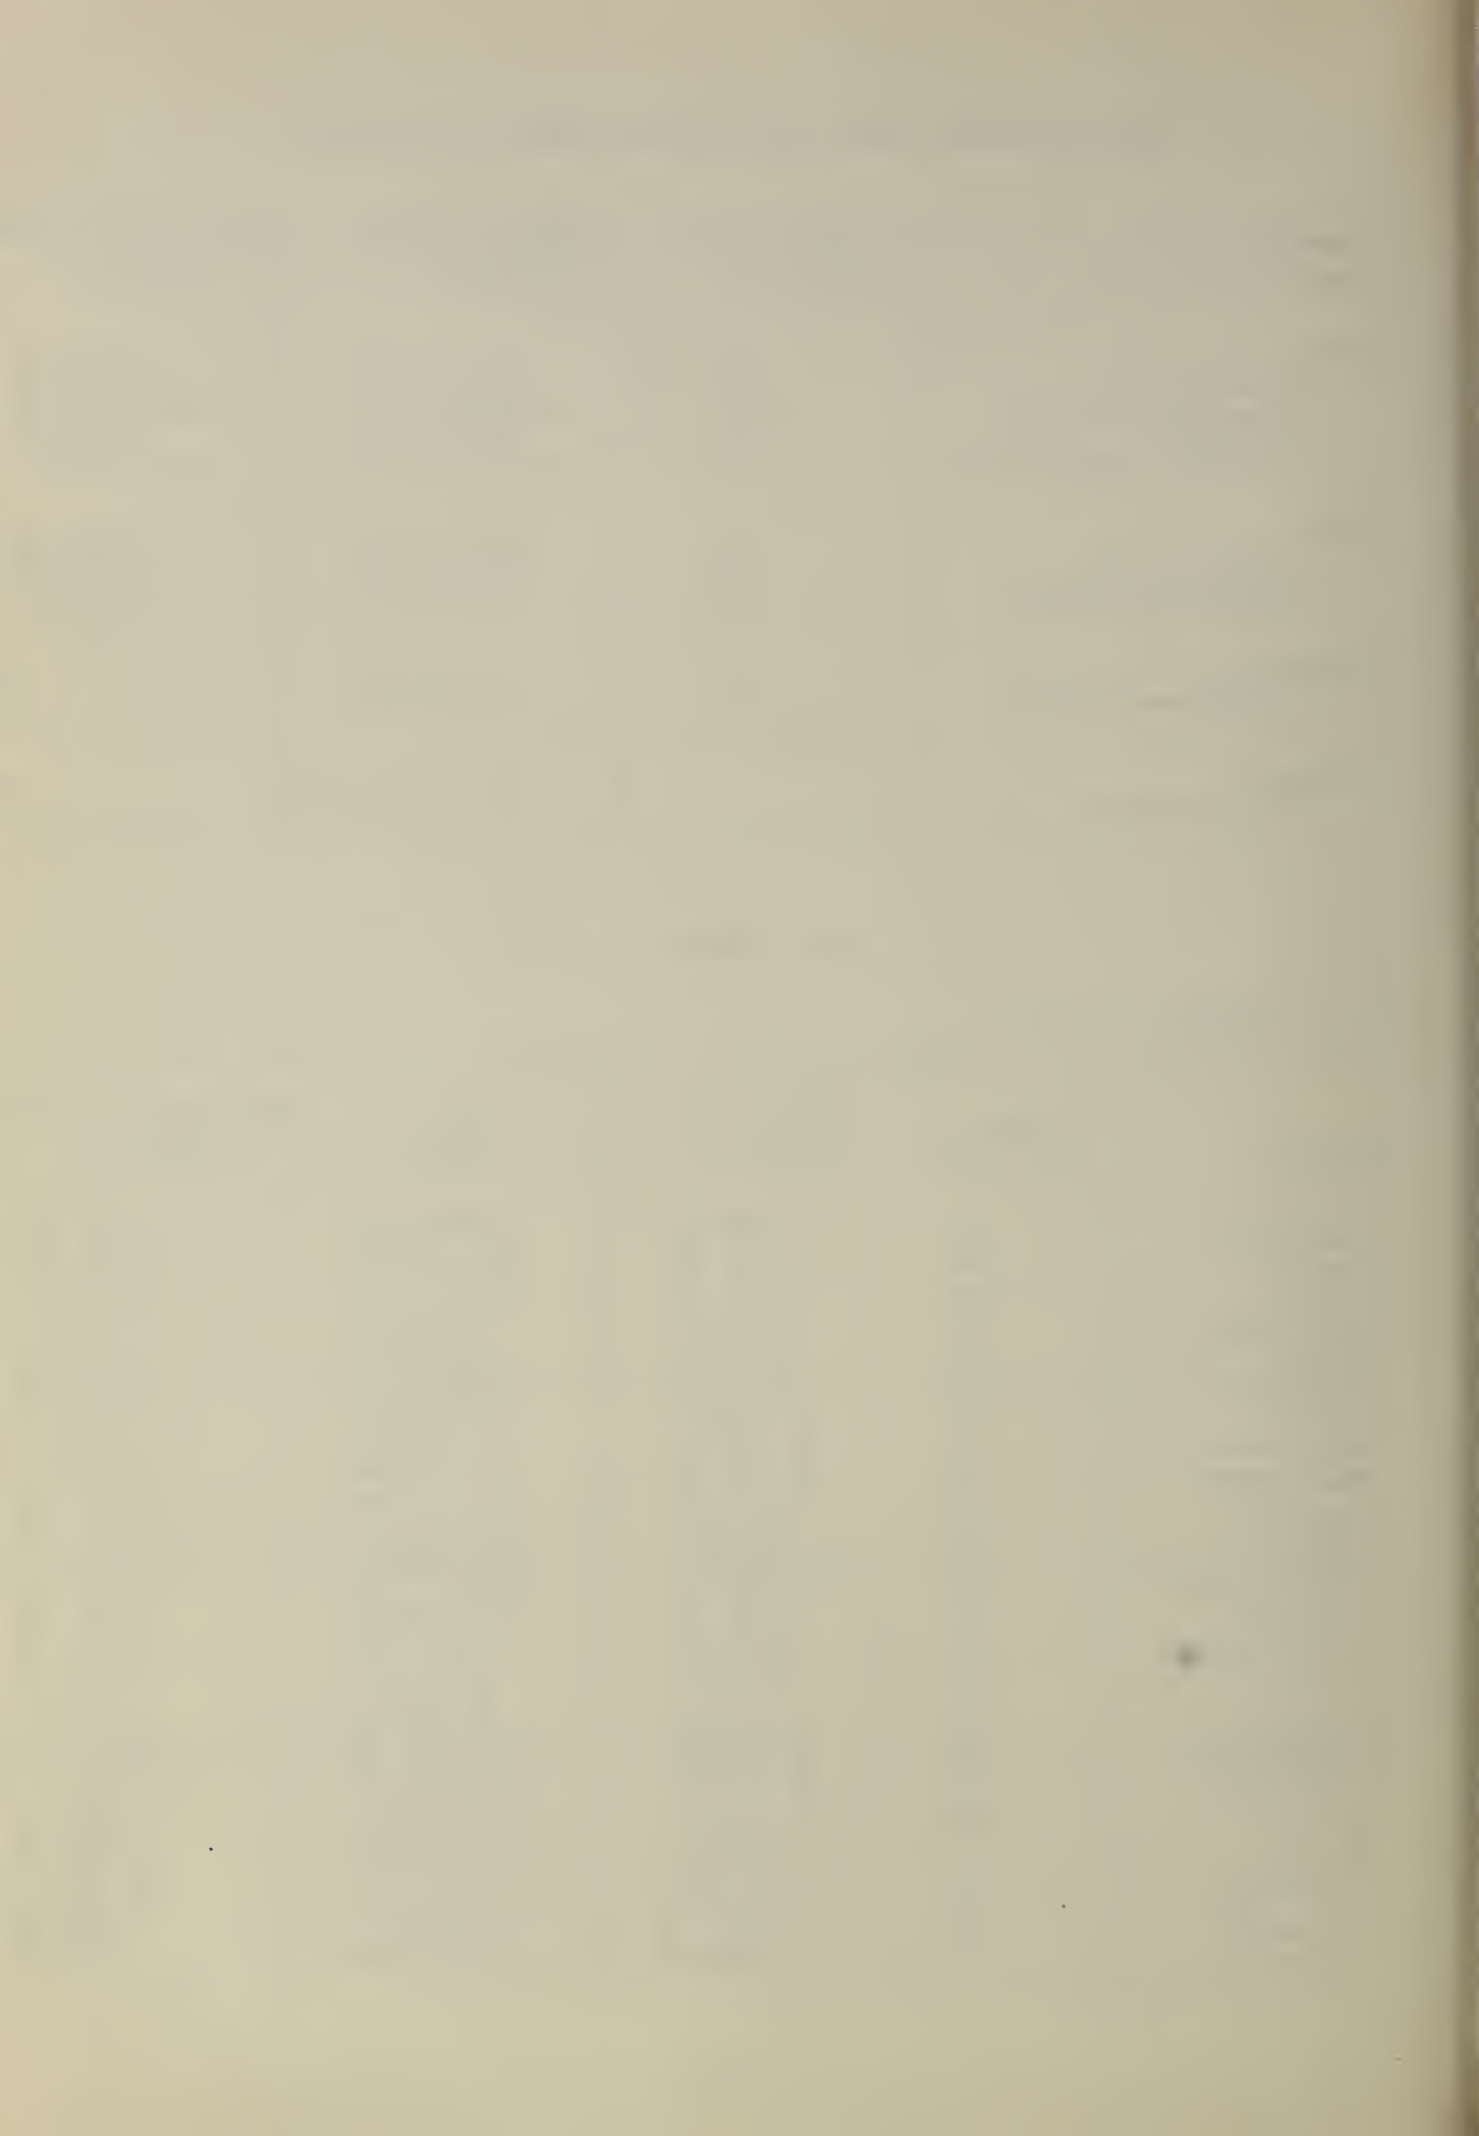

a. 1953 Commodity Loan and Purchase Agreement Summary

Commodity and Type of Loan	Number Loans Disbursed	Number Bushels Disbursed	Delivered to CCC (Bushels)
<u>Wheat:</u>			
Farm-stored	194	95,518.67	60,445.18

SECTION IV - THE 1953 DROUGHT EMERGENCY PROGRAM

Severe drought conditions throughout most of the State during the late summer and fall of 1953, following on the heels of drought conditions the year before, threatened economic reversals to many livestock and dairy farmers. Under Public Law 875 the Governor of Virginia requested that the State be declared a disaster area in order that relief in the form of low-cost feeds and hay could be made available for maintaining foundation herds of cattle, sheep, and goats through the winter months. Ultimately, sixty-one counties were approved for emergency aid by the Secretary.

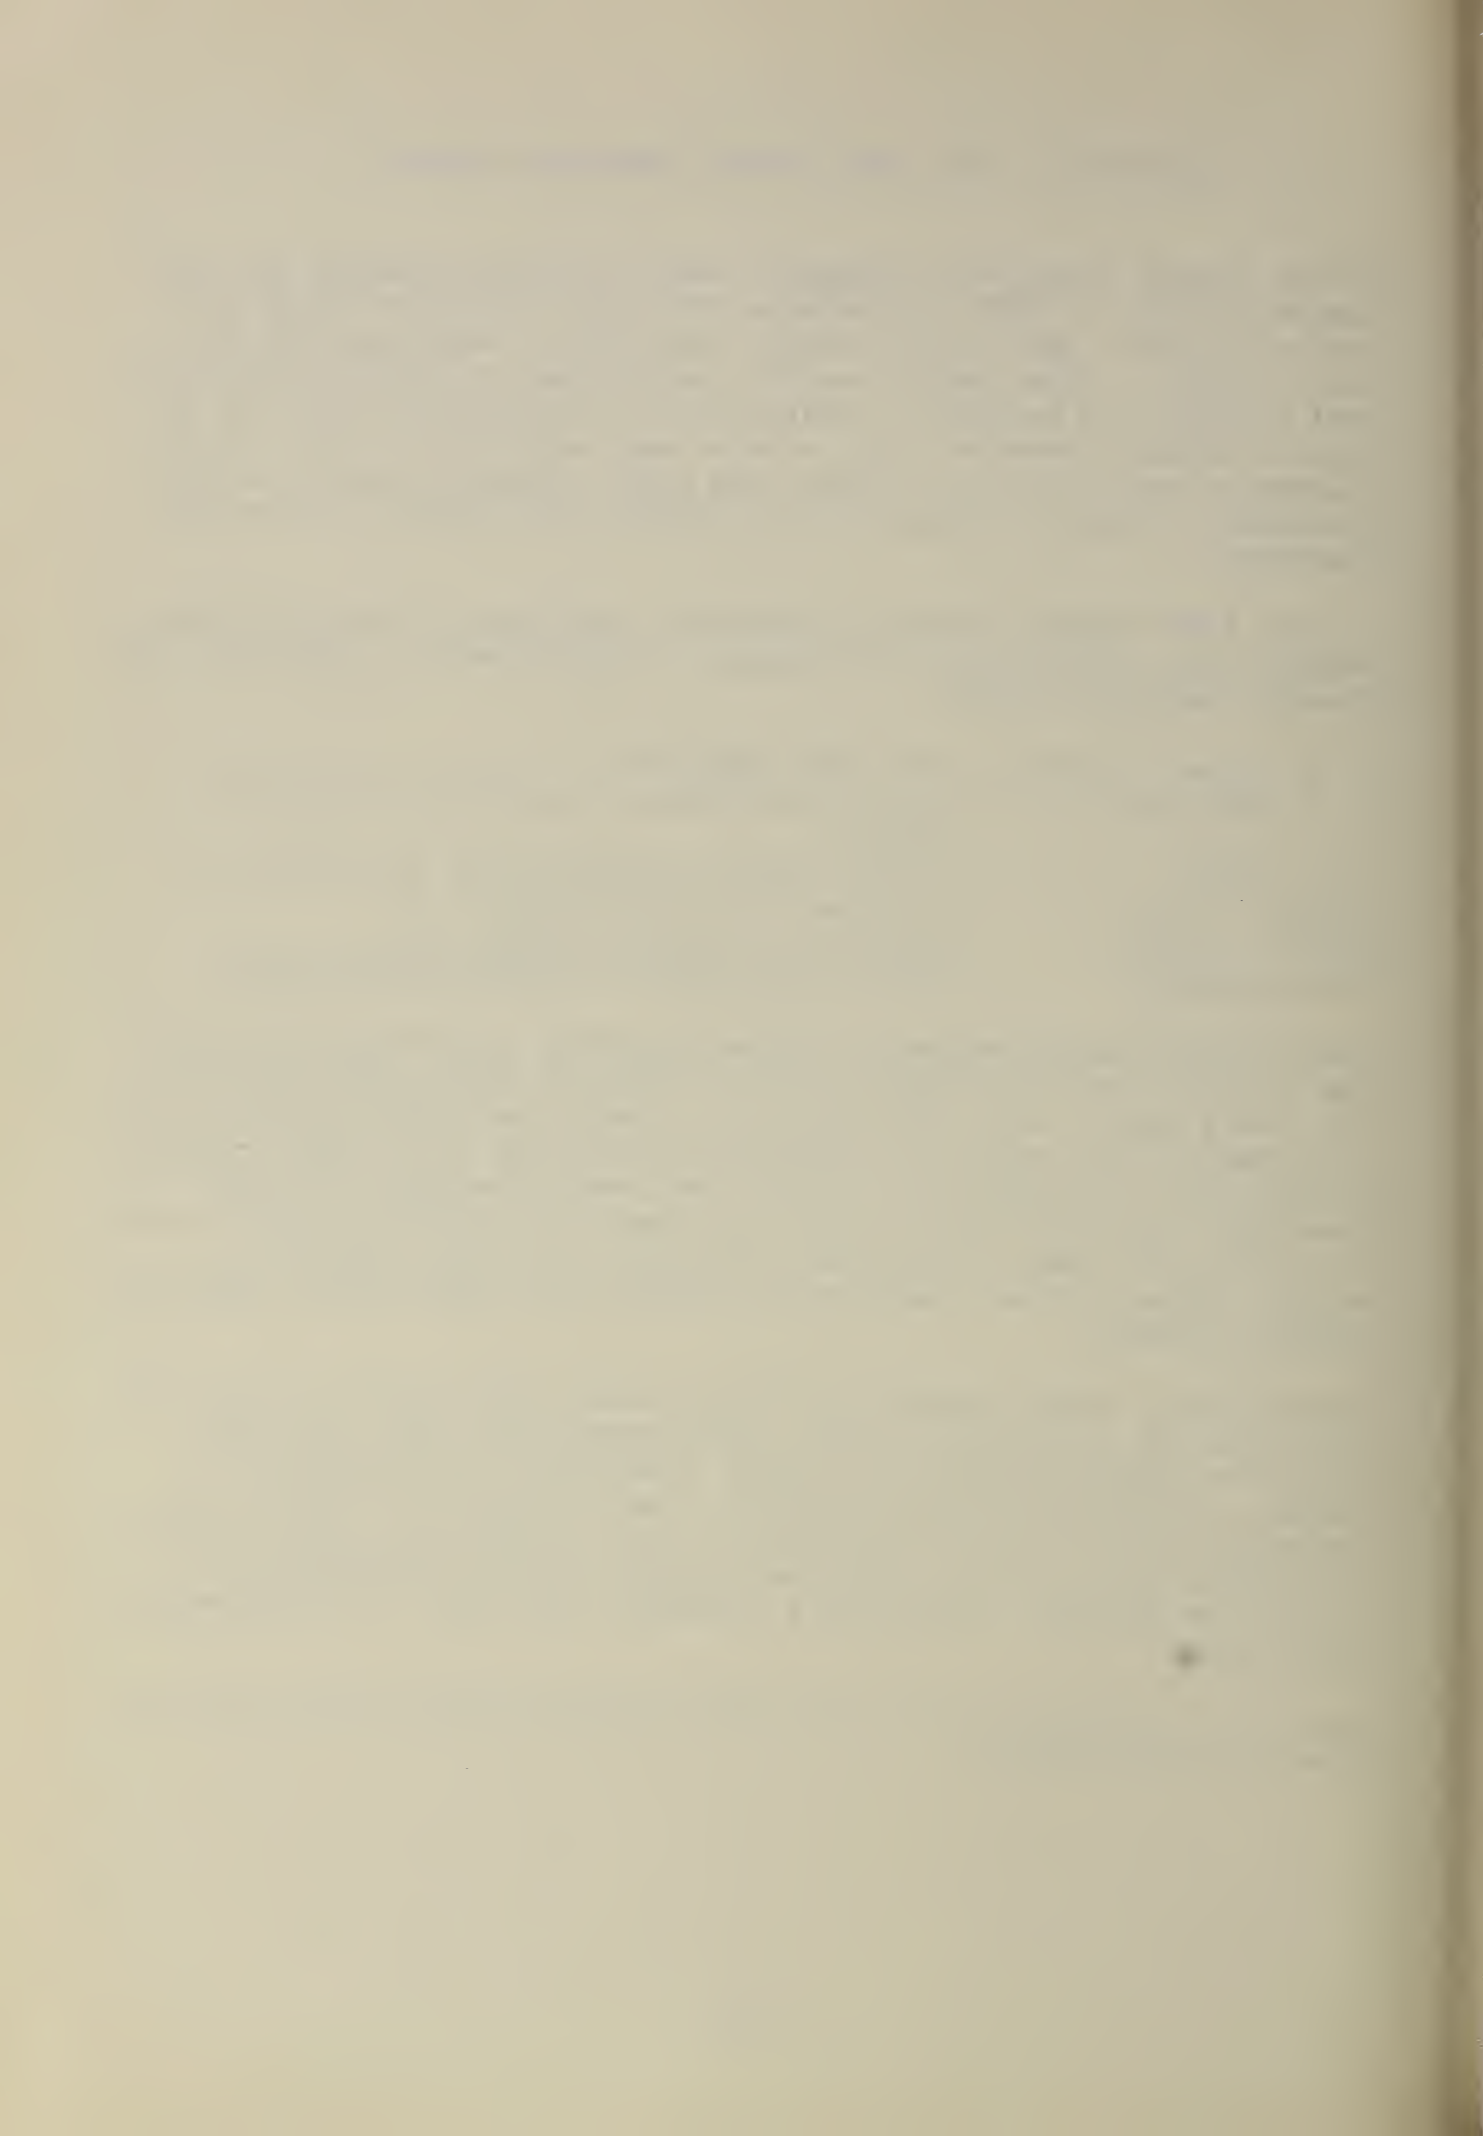

A State USDA Drought Emergency Committee, consisting of the following persons, was appointed by the Secretary of Agriculture to administer the Drought Emergency Program:

P. A. Lewis, Chairman	- State ASC Committee
W. H. Daughtrey	- Associate Director, Agricultural Extension Service
J. E. Stone	- Acting Director, Farmers Home Administration
Joseph H. Wyse	- Coordinator of Civil Defense
Giles H. Miller	- President, Culpeper National Bank
Allen Randolph	- Virginia Beef Cattle Producers Association

County USDA Drought Emergency Program Committees were set up in each of the sixty-one counties composed of the Chairman, County ASC Committee, the County Agent, and County Director, Farmers Home Administration; also a prominent local farmer and banker were appointed by the above members to round out the Committee. County USDA Drought Emergency Program Committees received applications from farmers and determined eligibility to receive the feeds. County ASC Committees and their employees handled administrative functions in ordering and supplying the feeds to eligible farmers.

The Commodity Credit Corporation made available from surplus stocks, at reduced rates, quantities of corn, cottonseed meal, oats, and wheat which were shipped directly to county committees and distributed to farmers. Mixed feeds were furnished through cooperating dealers who replenished stocks of cottonseed meal, corn or wheat, at reduced prices, from CCC stocks. Hay was furnished through the State Department of Agriculture through a cooperative agreement with the U. S. Department of Agriculture.

Quantities of feed shipped or furnished through dealers under this program are listed herein.

A. SUMMARY OF 1953 DROUGHT EMERGENCY PROGRAM

(1)

Mixed Feeds Furnished

	Quantity (cwt)	Corn in Mix (bu)	CS/M in Mix (cwt)	Wheat in Mix (bu)	Cost to Farmer
